## Handiline 4/45

**Easy to Install**

**CHOOSE A SITE FOR YOUR DRIER**  
Allow a clearance of 0.6m more than the rotating diameter.

**INSTALLING IN CONCRETE USING THE SOCKET PROVIDED**

GRAVEL SAND CEMENT

You will need a minimum of 0.017 cu.m of concrete in the following proportions:  
3 parts gravel, 2 parts sand, 1 part cement.

200mm 450mm

Dig a hole 200mm diameter by 450mm deep. Partly fill the hole with concrete leaving an available depth of 150mm. Position the socket centrally in the hole ensuring that the rim is at ground level. Add a further 60mm of concrete around the socket to locate it in position. Replace the drier in the socket and hold it vertically while filling the hole around the socket with concrete. Gently remove the drier ensuring that the socket remains vertical and finish the surface with fine cement.

**OPTIONAL ROTASPIKE INSTALLATION**

Install directly into the soil using a 38mm Rotaspikes. Not suitable for loose topsoil.

Simply hammer the Rotaspikes in VERTICALLY using a wooden dolly to protect it.

**EASY TO USE**

Insert the drier into the socket or spike.

Splay the arms out to release them.

Grasp the lower cross piece and push upwards.

Push the handgrip up the ratchet until the arms splay out fully and the line is tensioned.

The drier is now ready to use

**CAUTION**  
(Risk of entanglement - this product is not a child's toy).  
We recommend that young children are supervised if they are playing near this clothes line.  
This drier is provided with a socket so that it can be removed when not in use and stored safely out of the reach of children.  
We guarantee this product against frame failure due to rust (normal, a dated proof of purchase).
