## how to install

**IMPORTANT: DO NOT INSERT THE BUCKET FRAME INTO THE ONE-PIECE WELDED TRACK UNTIL THE LAST STEP.**

**1.** Locate area in cabinet for the one-piece welded track.

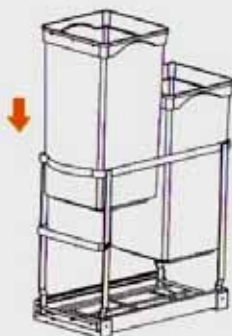

**Note:** The track must be located at least 2 inches behind edge of cabinet opening. Do NOT line up the track to the edge of the door, or else the handle will prevent the door from closing all the way.

**2.** Hold track steady in place and fasten the wood screws.

**3.** Gently insert the bucket frame into the one-piece welded track. (Be sure the curved handle is facing forward.)

**4.** Insert the polypropylene buckets into the bucket frame.

## to remove frame

---

**1.** If you want to remove the bucket frame from the track, pull the frame out as far as it will go. Find black release levers on the lower sides of the frame.

**2.** While pushing down on the right lever and pushing up on the left lever, pull out frame.  
**TIP:** To make removal of frame from track easier, get a friend to help.

## liners

---

The under counter pull-out can uses standard tall kitchen bags or simplehuman can liner **code 6**.

The narrower blue polypropylene bucket uses 30-38 litre medium rubbish bags or simplehuman can liner **code 10**.
